Speaker Details:

Mr. Sourav Giri brings over two decades of profound experience in the computer industry, showcasing a deep understanding of complex and extensive data within diverse databases and prevalent cloud environments. Renowned as a cutting-edge technology trainer, Mr. Giri has been instrumental in both designing and mentoring the development of **galpo.in**, as well as contributing to the creation of various other popular Bengali websites. Currently, he passionately engages as a speaker, focusing on sustainable technology and pioneering tool-building methodologies. Mr. Giri's dedication extends to championing the net-zero concept and actively participating in community building, making these endeavors central to his impactful pursuits.

Description of the topic:

The Impact and Journey of Artificial Intelligence (AI) in the Computer Industry

The impact and journey of Artificial Intelligence (AI) in the computer industry have been transformative and continue to evolve rapidly. AI has had a profound effect on various aspects of the computer industry, from hardware design to software development and applications.

The concept of AI was first introduced in the 1950s. Then, during the 1980s-1990s, AI technologies like expert systems were applied in industries such as healthcare and finance for decision support.
