In the Inauguration program, a warm welcome address was given by Mr. Subhadeep Mondal, Program Officer of NSS cell, RERFGI. A program of " INTERNATIONAL NURSES DAY " was arranged at Dr. B. N. Bose Sub Divisional Hospital, Barrackpore.

Venue: Dr. B. N. Bose Hospital, Barrackpore

Number of students participates: 14

About the Program:

International Nurses Day, annual observance held on May 12 that commemorates the birth in 1820 of Florence Nightingale, the foundational philosopher of modern nursing. The event established in 1945 by the International Council of Nurses (ICN), also serves to highlight the important role nurses fulfil in health care. With this thought, NSS team of RERFGI organized a celebration program of "International Nurses Day" on 14th May. It is the economic power of care which creates healthy people and societies and drives healthy economics, "Our Nurses Our Future".

The whole event was set up among the nurses of Dr. B. N. Hospitals, Barrackpore. On this day, NSS Volunteers, Faculties & Nurses arranged a beautiful cultural program to celebrate the "International Nurses Day".

This event started at 11: 00 am and continued for 2 hours. The whole event was giving the picture of emphasizing the importance of nurses in our society.

Brief Report:

The Robotics Program at RERFGI on 21st and 22nd May 2024, is a multidisciplinary initiative aimed at equipping students with the skills and knowledge to excel in the rapidly evolving field of robotics. Through a blend of theoretical coursework and hands-on practical experience, the program fosters innovation, creativity, and problem-solving abilities among students. 30 students of various Schools were participated in this 2-day workshop. The workshop is designed to provide participants with a foundational

understanding of Arduino microcontroller programming and basic electronic principles.

Day1:

On day 1, a brief discussion about microcontrollers, Arduino boards with a special focus on Arduino UNO, its application and significance, and programming with Arduino IDE (sketch), were done. Students are given the idea of simulating Arduino using Autodesk Tinkercad (<https://www.tinkercad.com/>).

Day2:

On day 2, brief deliberation about Sensors, actuators and a hands-on project on automated weather station using DHT11, were executed in guidance of our speaker.

Various students from renowned schools attended this workshop with great enthusiasm. By the end of the workshop, participants will have a foundational understanding of Arduino, basic electronics programming concepts, and the ability to create simple Arduino-based projects. A few images of this event are provided here.

ABSTRACT

The workshop is designed to provide participants with a fundamental understanding of Arduino microcontroller programming and basic electronic circuits. Over the course of two days, participants will engage in both theoretical learning and hands-on practical sessions to develop fundamental concepts and develop projects.

TARGET AUDIENCE

Students or teachers who have basic knowledge of physics and electronics.

PREREQUISITE AND OUTCOME

Prerequisite:
• Proper use of wiring, switches, and other electronic devices.
• Basic knowledge of computer programming (basically C/C++ programming).

Outcome: By the end of the workshop, participants will have a fundamental understanding of Arduino, basic electronic principles, programming concepts, and the ability to create simple Arduino-based projects.

DURATION

This is a 2-Day Workshop (18:00 hours). Each day there will be 100 students. On the second day, there will be 50 students.

AutomationXtreme
A new way of the electronic world

RULES AND REGULATIONS

1. This 2-day (18 hours) workshop is divided into four sessions. The workshop is furnished with hands-on training along with the theoretical ideas. The concept of any computer programming language is preferable. The mode of communication will be in English / Bengali during the workshop.
2. The registration and the workshop is free of cost. Certificate will be provided to the participant after the successful completion of the workshop.
3. A school can send only one team. The team can have a maximum of 4 students and a maximum of 1 student. The students' details must be provided during registration. All the students must be from T10 or T11 standard.
4. School must identify one teacher or staff as a SPOC (Single Point of Contact Person). Our team will contact him/her whenever necessary. In the end, he/she will be required to help the student during the workshop. The details of the SPOC must be given during the workshop.
5. After the final date of registration is over, our team will also the exact date of the workshop to your school which will be within the month of April. The date, however, may change under unavoidable circumstances which will be informed to you well ahead.
6. This is an offline workshop. All the participants and the SPOC must be at the venue at the given time.

COURSE OUTLINE

► **DAY 1 SESSION 1**
What is a microcontroller?
Introduction to Arduino
• What is Arduino?
• Different types of Arduino board
• Applications and drawbacks
Understanding Arduino Uno Board
• Components of the board
• Input/output pins
• Power supply options
Introduction to Sketch
• Installing and understanding Sketch
• Downloading and uploading a program
• Installing cross library

► **DAY 1 SESSION 2**
Programming with Basics
• Setup() 
• loop() 
• pinMode() 
• digitalWrite() 
• analogRead() 
• analogWrite() 
• Serial.begin() 
• Serial.print() 
Introduction to Interfaced
• Connecting, dis-conn and testing using breadboard
• Basic programs

► **DAY 2 SESSION 1**
Sensors and Actuators
• Types of sensors (e.g., light, temperature, motion)
• Introduction to actuators (e.g., motors, servos)

Interfacing Components

- Connecting and configuring sensors and actuators with Arduino.
- Project: Automated weather station using (DHT11)
- DHT11 pin configuration
- LCD 16 x 2 pin configuration
- Circuit diagram
- Code

► **DAY 2 SESSION 2**
Project: Automated weather station using (DHT11)
• Starts on coding
